

# VALENTYNA PROTSAK ART

## Strong contrasts and pastel colors

Valentyna's expressionist yet figurative paintings illustrate bodies and characters through the painter's own aesthetics. The artist combines strong contrasts and pastel colors to transmit the reality as she sees it. Her depiction of daily life is strongly influenced by her personal experiences. Valentyna's paintings allegorize an encounter with contemporary society and its visual imagery.

„I forgot about myself“  
The self portrait collection
